Dr. Burkette Raper

Mount Olive College is expanding its educational program and campus facilities in order to better meet the needs of students. The distinctive qualities that have always characterized Mount Olive will be maintained in the growth to a four-year school, and the individual needs of students will continue to be met as academic programs are expanded.

The Associate in Arts Degree and the Associate in Science will continue to be available for students who desire two-year programs of study. Students who enrolled in 1982 will be the first class to pursue courses of study leading to the Bachelor of Arts or the Bachelor in Science Degree. The first four-year graduating class will be in 1986, and majors will be in the areas of Business Administration, Accounting, Religion, Church Ministries, and Liberal Arts.

The construction of College Hall, an athletic/physical education/convention center, is Mount Olive's commitment to the future. College Hall will enhance the quality of services offered by the college to students, the community, and the church. The building will provide a home for educational, cultural, civic, and religious events as well as recreational facilities for college, church, and community groups.

What did we do this time?

Throw it

Ricky Grantham

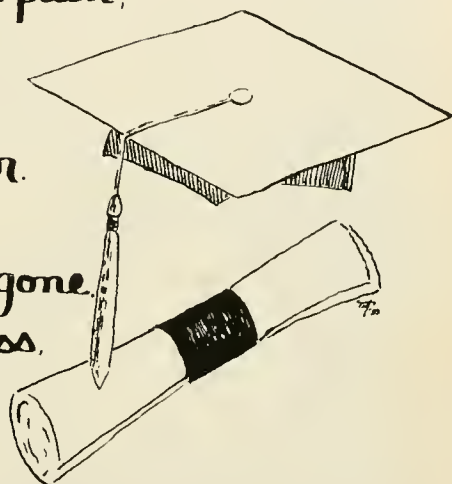

Tyrone Brown

Andy Jones

Another year goes passing by,
another dawn is here.
To some this brings a joyous smile,
to others, brings a tear.
For two years you have tread a path,
from dawn to setting sun.
But now the path gets steeper,
and the climb has just begun.
We're very glad we know you,
we'll miss you when you've gone.
And from our class to your class,
We dedicate this poem.
